MEETING MINUTES

Project: *A Map Management Platform for Self-Driving Cars*

Date of Meeting: 15/03/2021   **Location:** AIML 1.30 Meeting Room   **Chair:** Nhu Quynh Hoa

Time of Meeting: 10 am - 11 am   **Minutes Prepared By:** Jonhatan Cotes Calderon

1. Purpose of Meeting

The second meeting for the Master of Computing & Innovation Project was held to present the progress produced by the team in the first week and further discuss project requirements.

2. Attendance at Meeting

Client: Anh-Dzung Doan, Yasir Latif

Project team: Jonhatan Cotes Calderon, Huu Thanh Nguyen, Aryaman Dhawan, Nhu Quynh Hoa

3. Meeting Notes, Decisions, Issues

Jonhatan showed the progress of the webapp: Boilerplate, Mapillary API Integration, Demo with current fetched data.

Dzung advised the team to write a function that, by a defined bounding box, fetched all the data available from the API.

Arayman presented a draft architecture for the web-app using Django as the framework for the backend.

Dzung proposed to research and validate the better Database option for the project (MongoDB, NoSQL, SQL). Also, he reiterated that the top requirement for the project was that the platform needed to be as responsive as possible.

Finally, the team discussed with Yasir the need to download the images directly to the Database. A second approach was also discussed: the webapp could pottentialy fetch a particular image from the API on the fly. The decision of which approach to take would depend on the amount of data obtained from Mapillary.
